Farnam's Chrysanthemum Farm Plants and Clumps

1947

New Blaine, Arkansas

IF EXTRA PLEASE HAND TO SOME FLOWER LOVER

TO OUR CUSTOMERS:

Our plants are State inspected and true to name. We guarantee all plants to reach you in good condition, should they arrive in poor condition due to delay en route, just have your postmaster or carrier sign your claim. Your order will be refilled. In any event we will not be liable for more than the purchase price of the plants.

We cannot accept orders for less than six plants. Please don't ask us to.

At this writing the box situation is still difficult.

IN MAKING OUT YOUR ORDER BE SURE TO GIVE ORDER NUMBERS as well as name of plants, and in order to help us give you better service specify approximate shipping date. If your order is placed early, we will make every effort to ship on date requested. Orders sent in late March or April, must allow us at least three weeks time to fill order. However, if we have well rooted plants ready your late order may be filled within a week, but allow us three weeks time anyway.

We start shipping when plants are well rooted—about April 15. Our plants are large and vigorous. Most of our customers re-order yearly.

And now, best wishes for all success and much enjoyment in your garden, may it grow more beautiful year after year.

M. FARNAM.

NEW VARIETIES

HARDY GARDEN CHRYSANTHEMUMS Pompons, Singles, Anemones

The selection of Hardy Chrysanthemum offered consists of the very finest early flowering and late flowering varieties. The color range is complete and represents the most desirable shades and tints. Any one of the varieties listed may be grown by you with the positive assurance of providing you with masses of color for the late garden. Beginning with the early

cushions, and almost any of the others for later on.

Pompons are rounded blossoms of perfect form, ranging from small or so-called buttons (1½-inches in diameter) as the Jewells, to the large balllike flowers of the Dot's and Doty's (3 to 41/2 inches in diameter). This large size applies to disbudded Poms. All are strong, upright growth, requiring little staking, if any, and have a greater ability to resist frost than the other types and for this reason are particularly valuable for the North where frosts come early. Are unsurpassed for cut flower work.

Anemones are one or more flat rays of perfect petals, but with a pronounced cushion or disc in the center of the flower.

(H-Indicates hardy or garden varieties; D-Indicates varieties suitable for disbudding.)

35c Each; Three Each, 90c.

NEW ENGLISH CHRYSANTHEMUMS

These new Chrysanthemums are much larger than ordinary garden varieties. They should be disbudded the same way florists do the large Mums to 8 to 12 blooms to the plant, and it is almost unbelievable the lovely flowers you can raise and the enormous size of the blooms.

EACH, 45c; THREE OF EACH, \$1.20

- ELITE, A lovely soft rose pink with tips of the petals bright gold. ROSE PRINCESS, Salmon rose, with a basal flush of gold. W_{-1}
- J 4
- BELLE MAUVE, A lovely stiff-stemmed mauve pink. J 2 W 6 CRUSADER, An immense white.
- W 7 PRIMSROSE CIRCLE, An immense primrose yellow, incurving petals.
- JEAN HARLOW, A bright golden yellow. W10 ALEX MASON, Rich buttercup yellow. W12
- GOLD STANDARD, Extra large deep yellow; very early. J 1
- CONQUEROR, A lovely rich crimson. W11
- COPPELIA, This is quite a new shade, a bright Indian red. K 2
- CRIMSON BUTTERCUP, Identical to Bronze Buttercup, except the K 4 reverse petals are crimson.
- BRONZE BUTTERCUP, Deep bronze incurve, with gold buff reverse. \mathbf{J} 3

LARGE FLOWERING COMMERCIAL VARIETIES

To produce those big blooms, they must be disbudded, leaving from one to four blooms per plant. Pinch tops when plants are eight or ten inches high. (P) Indicates varieties suitable for pot plants.

EACH, 45c; THREE EACH, \$1.20 12, LABELED, OUR SELECTION, \$4.50

HELEN FRICK, BRONZE FRICK, WHITE FRICK LARGE FLOWERING VARIETIES

Try these three beauties for late flowering indoors. Grow them in your garden until early part of September. Water well before lifting; lift with a ball of soil, press into pot, water well, keep shaded for a few days.

3 PLANTS, ONE OF EACH, \$1.20; 9 PLANTS, 3 OF EACH, \$3.50

CUSHION OR AZALEMUMS

Growing from one to one and a half foot dense rounded plants, this together with their exceptionally long flowering season, makes them the best of all the hardy Mums for edging and low masses of color. Blooms late summer on.

ONE EACH, 35c; THREE EACH, 90c; 12 EACH, \$3.50

Order No.

- L10 WHITE CUSHION, Pure white, small bloom.
- L 9 GOLD CUSHION, Golden yellow, large bloom.
- L 8 BRONZE CUSHION, Brick red, Int. blooms.
- L 7 PINK CUSHION, Soft pink, int. bloom.
- L 4 EARLY RED CUSHION, Earlier blooming, red cushion, semi-double.
- L 6 RED CUSHION, Lovely green mound all summer, dark red bloom, Matures Nevomber 1.
- L 2 COCHECO, Deep lavender, a new color for cushion.
- L 5 SANTA CLAUS, Reddish bronze, blooms from spring on to fall.

PANSY PLANTS

BALL GIANT MIXTURE

Well known, excellent all-purpose mixture of the finest strains available of Swiss or Roggli Giants. Separate colors were mixed to insure a well balanced color blend. The finest bedding Pansy strain available. If you have never grown Pansies, try some. To grow them once is to love them always. Nice wintered over plants for February delivery only.

50 PLANTS, \$1.75; 100, \$3.00, Postpaid

CULTURE OF CHRYSANTHEMUMS

Garden culture of Chrysanthemums can be about the last word in simplicity. The more important needs of Chrysanthemums are given here. Good average soil, such as required by any vegetable crop-well rotted barnyard manure, plus 20 per cent superphosphate, leafmold, or peat moss, supplemented by a well balanced chemical fertilizer. Soil should be prepared to a depth of 15 or 18 inches, incorporating all fertilizers thoroughly.

Planting should be done with care, watered well, and loose soil pulled

around base of plant.

Avoid old overgrown clumps. Healthy divisions or pieces taken from an old clump give best results.

Do not overcrowd-18 inches apart or 18 inches from any other plant is

close enough.

To avoid lanky or spindly plant growth, pinch the plants once, when plants are six or eight inches high.

Under no circumstances use chemical fertilizers when the soil is dry. Liquid manure is safe at any time. Late August or early September a complete fertilizer such as Vigero or 5-10-5 is in order.

To grow large flowering Mums, keep all side shoots rubbed off and when buds form pinch out all the buds except the large terminal or crown bud; grow one to four blooms to a plant.

The large Pompoms may be disbudded; the blooms then form a love-

ly large ball.

To control leaf spot, spray with Bordeaux mixture, or dust or spray

with dusting sulphur, or liver of sulphur. Protexall is mighty good, and can be purchased from Vaughan's, Chicago, Ill.

Hardy Chrysanthemums can well be used as accent points in a mixed hardy flowering border. The tough varieties of hardy Mums are well adapted to planting in locations where many garden flowers will not

The cushion type and other dwarf sorts for use as low edging for taller growing plants or for the hardy border.

For smaller gardens, where space for solid masses of color is not available dramatic effects can be obtained with groups of three to six plants at intervals in a long border.

Planting groups of hardy Mums where shrubbery plantings or evergreens will make a background.

Along walls, the foliage makes an attractive ground cover until plants come into full bloom.

To form a line between vegetable

plot and flower garden.
It is no trick at all to transplant Chrysanthemums in full growth or showing color, to pots and window boxes, or to any part of the garden or grounds where earlier blooming flowers have left undesirable gaps in your planting scheme. They may be grown in your vegetable garden or some out of the way corner and then moved.

combining dwarf, medium- $\mathbf{B}\mathbf{y}$ height and tall growing varieties it is possible to get a sloping bank of color glory in the late garden.

BOOK FOR SALE

CHRYSANTHEMUMS How to Grow Them Out of Doors

Written by experienced members of the Portland Chrysanthemum Society and other authorities. We have found it to be one of the best books on growing Chrysanthemums out of doors. The many contributors to this book are all successful growers and by purchasing it and following instructions you will be able to be another successful Mum grower and blue ribbon winner.
